Cooking Through the Pandemic

December 2020

Language Learning through Culture and Cooking (LLCC)

Working updates

Despite a global pandemic we are focusing on our transnational project developing various innovative material to be used by trainers throughout Europe to engage with teaching languages through Cooking and intercultural dialogue.

Training Guidelines on how to deliver the Course

We are currently working on two manuals that will give trainers useful tips and strategies on how to deliver our LLCC language course. Manual 1 is a guide to the delivery including adapting to online teaching, Manual 2 is a supporting manual for supplementary help and guidance.

Handbook on Healthy Eating Using Traditional Local Food

During a global pandemic it is especially important to keep a healthy lifestyle. Our Handbook will provide useful tips on how to use traditional local food for healthy cooking! With recipes and input from all our partner countries, the Handbook will be useful for the delivering process of our course!

Video-making for our training materials

To make our already developed training material even more interactive, we are working right now on Introduction videos that will introduce our four modules as part of the language course.

Preparations for C1 training

How to organize
Transnational trainings
in pandemic times

The Covid-19 pandemic forces us to adapt our transnational Train-the-Trainer event in January to an online meeting event.

Despite the fact that we will not have the possibility to see each other, we are giving our best to organize a useful and engaging training course. We will test our developed material and provide so feedback that will serve for the course held in each partner country.

The C1 training event with trainers and staff members from all our partner's will take place from 12th to 15th January every day from 10 to 14.

What is it all about?

f Update

Our project in a nutshell:

- We have created a new language course combining cooking with culture
- We aim to empower trainers with new and innovative training materials to deliver an interactive course for migrants and refugees
- Innovative new training materials will sharpen intercultural awareness and language learning through the medium of cookery
- We have developed two manuals with team building, integration exercises, delivery techniques and lesson plans.
 One Healthy Eating Handbook
- We create an Online Resource
 Toolbox of Lessons, Materials,
 Guidance and Handbooks including
 also interactive videos. Website:
