

EGInA has the pleasure of announcing the 1st Press Release of the project Eco-Literacy and Green Education for Climate Action.

13 February 2023, Italy

PRESS-RELEASE

Project Kick-off!

We are pleased to introduce our new project: Eco-Literacy and Green Education for Climate Action, shortened to **ECOLitAct!** ECOLitAct is a 30-months Erasmus-funded project aiming to develop an innovative, inclusive, self-paced and adaptable approach to teaching about **eco-literacy** and **eco-behaviours/attitudes**, while countering **climate denial**.

The main goal of the project is to create green education opportunities for **VET learners** from different backgrounds and innovatively provide learning material which can be directly utilised by **VET practitioners/educators** throughout Europe.

The project is pan-European with partners from **Sweden, Greece, Germany, Slovenia** and **Italy**, collaborating for holistic results.

PROJECT BACKGROUND

ECOLitAct seeks to empower VET practitioners/educators and learners to counter **misinformation related to environment and climate change**, and to inspire them to adopt **eco-friendly behaviours/attitudes**.

It seeks to develop digital Green education/training opportunities and material embracing "**eco-literacy**" (MIL applied to ecology and climate change) and that focus on behavioural/attitude shifts while being available to all, especially to individuals with fewer opportunities and in a digital format.

The project will support **climate action** by *inspiring critical thinking, developing digital and MIL skills, and encouraging attitude/behavioural shifts*. It will do so by creating **learning material** compiled in a Toolkit and Handbook reviewed/tested with 75 practitioners/educators in total.

It will make this learning opportunity available to all in a *self-paced and individualized manner* through an educational structure based on a self-assessment tool which will guide each person's learning pathway.

For more information about the project, contact julia.moreira@swideas.se

PRESS-RELEASE

ECOLitAct Kick-off Meeting

The **first ECOLitAct project meeting** was held online on 20 January 2023 and was attended from representatives from the partners:

SWIDEAS AB

ACTIVE CITIZENS PARTNERSHIP

IBERIKA EDUCATION GROUP GGMBH

ANDRAGOŠKI ZAVOD LJUDSKA UNIVERZA VELENJE

EUROPEAN GRANTS INTERNATIONAL ACADEMY

PROJECT RESULTS

From the beginning of the project in January 2023, partners have been working to develop **three concrete results**:

1. Development of **1 Toolkit** containing **10 OERs** addressing MIL literacy, critical thinking, and digital skills and **5 Scenarios** promoting eco-friendly behaviours and attitudes.
- Development of **1 handbook** containing **5 digital lessons** targeting MIL skills development around environmental topics, sustainable living approaches/attitudes, and promoting general knowledge on the thematic of climate change.
 - Development of an **education structure** based on a self-assessment tool for the learners to understand their skills/competencies needs regarding MIL related to climate change & environmental knowledge/behaviours/attitudes and select their individualized education.
